If you payed for anything
but the original ROM..
..then you got scamed!!

YOU FOOL!!

WHY THIS HACK EXIST?

Never planed a series I just had like to make a quick project.

Since bigger plans did not go as planed and I needed to work on the disassembly to be able to make more advanced changes.

So it did come I did spend way more time on this as I intended. Did try a view gimmicks and also tried myself in story telling a bit. The whole hack is a brutal challenge hack that should make you good and teach advance mechanics to navigate through Stages and fight bosses.

There are also secrets to discover.
Good luck!

HOW TO PLAY?

There are people in the Town and you can talk to them when pressing up.

Don't miss out on the hideout when going up in the first screen. Lena will help you learning the moves or change controls. The recording feature is there so you can toy around and learn the moves.

Game saves when you clear a screen and hear a sound. To delete a save you need to go to the option menu.

Once you found more Whip you can switch between them when pressing select.

Also while holding A you can walk backwards.

THE MAP

You get to the map from the continue option or holding select while the game is paused.

Then select levels you have played so far by holding up or down.

Select will toggle between Nightmare mode and normal!

THE SUB-WEAPONS

The silver dagger is a fast projectile that inflicts massive damage when you manage to hit.

The barbarian axe does what a barbarioan love!

The holywater can be thrown far when holding the button and holding the direction it should go.

The cross is feared by vampires. It is also a bit more expensive then other subweapons. But you can get some back once you catch them again. Also watch out not to get cursed else the cross can play tricks on you.

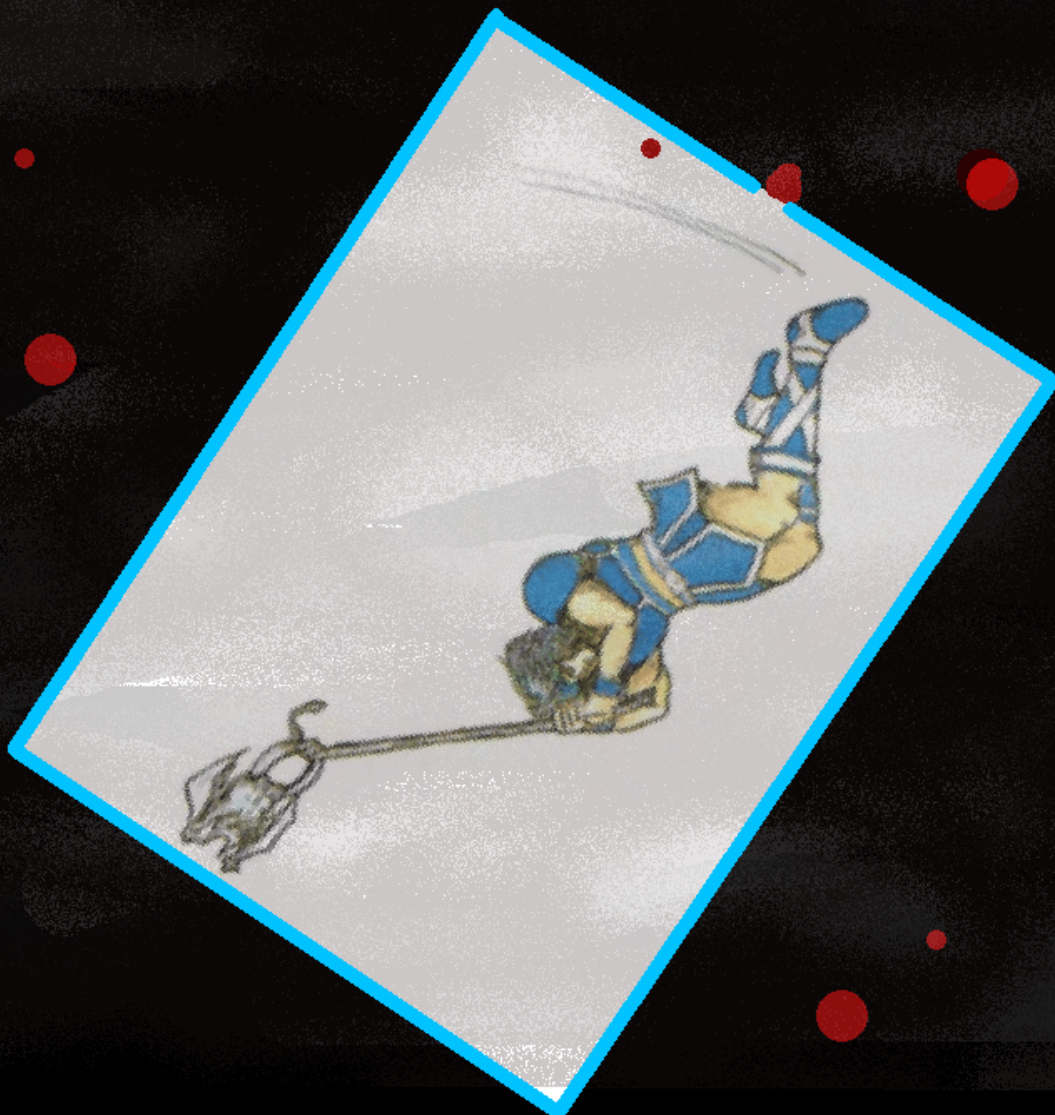

WHY RINGS WHY!?!?

It is a personal favorite that the game does let you grab the ring from above.

Makes no sense but it is incredible fun once you get the hang of it.

You need balance and learn when to let go! Observe the movements carefully and show the world who is boss.

If you are not happy with how the game does invert the control Lena in the hideout can fix this for you!
